Abstract: The abstract should summarize the content of the paper. Try to keep the abstract below 500 words. Do not have references in the abstract. It is imperative that the margins and style described below be adhered to carefully. This will enable us to maintain uniformity in the final printed copies of the Journal. Papers not made according these guidelines will not be published although its content has been accepted for publication. Paper form is a necessary condition for its publication, as well as its content.

Key-words: At least 3 to 6 key words

1. Introduction:

The text must be in English. Authors whose English language is not their own are certainly requested to have their manuscripts checked (or co-authored) by an English native speaker, for linguistic correctness before submission and in its final version, if changes had been made to the initial version. The submitted typeset scripts of each contribution must be in their final form and of good appearance because they will be printed directly. This document is set in 12-point Times New Roman. If absolutely necessary, we suggest the use of condensed line spacing rather than smaller point sizes. References should be like this ^[1, 2, 3].

2. Materials and methods

Major headings are to be column centered in a bold font without underline. They need be numbered. "2. Headings and Footnotes" at the top of this paragraph is a major heading.

3. Subheadings

Subheadings should be as the above heading "2.1 Subheadings". They should start at the left-hand margin on a separate line.

4. Footnotes

Footnotes should be typed in single-line spacing at the bottom of the page and column where it is cited. Citation Style- Bluebook 20th Edition.

5. Tables and Figures

To insert "Tables" or "Figures", please paste the data as stated below. All tables and figures must be given sequential numbers (1, 2, 3, etc.) and have a caption placed below the figure ("FigCaption") or above the table ("Fig.Talbe.1, 2 ") being described, using 8pt font and please make use of the specified style "caption" from the drop-down menu of style categories

8. Conclusions

Here conclude your finding to with object of your studies.

9. Appendix

Appendixes, if needed, appear before the acknowledgment.

10. Results and Discussion

This section should be placed separately. It must represent sufficient experimental data to enable the experiments to be repeated. Authors must notify the main findings of the research, providing a clear explanation of their significance and relevance.

11. Acknowledgment

Acknowledgments recognize the contribution of funding bodies and anyone who has assisted in the work.

12. References

References list relevant papers referred to in the other sections, citing original works both historical and recent. In this section, references should be sequenced in the order these appear in the text in the form of reference list. The number of references should preferably be limited to 50 (with the exception of review articles). The references should be in numbered format.
