## ABOUT SHASTRI INDO-CANADIAN INSTITUTE

In the year 1968, with its basic objective of improving the '*quality*' of life of the people of Canada and India by building and strengthening intellectual and cultural linkages through academic research, dialogue and exchange, Shastri Indo-Canadian Institute started as a bi-national organization promoting understanding between India and Canada. The Shastri Indo-Canadian Institute became bi-national in 2005. It has the honour of being the only Institution which has 142 premier academic Institutions as its members in India (including IITs, IIMs, NITs, Law schools, Central and State Universities) and 37 universities in Canada (including McGill, Queen's and York Universities).

The Institute's scope has expanded as well to include law, management, arts, information science, environment, science, and technology including biotechnology along with humanities and social sciences. The aim is to further the bi-national ethos through different programmes facilitating scholarly research and exchanges between the Indian and Canadian Universities, Cultural organizations, Government Bodies and United Nations Sustainable Development Goals.

## ABOUT THE CONFERENCE

There has never been a more critical time for oceans and marine life than now. The threats of overfishing, climate change and pollution are expected to cause a cumulative loss of at least USD \$428 billion to the global economy. As a step to combat this issue, the United Nations came up with the Sustainable Development Goals ('SDG') under which SDG 14.6 specifically deals with the issue of sustainable fishing and ocean management. In a bid to fulfil the mandate of the SDGs by 2030 as aimed, international organizations and countries globally seem to work together.

The recently concluded MC12 negotiations are a testament to the global support and intent towards sustainable fishing and oceanic life protection. The historic negotiations panned over two decades and concluded with the Agreement on Fisheries Subsidies ('Agreement') on 17 May 2022. After nearly 20 years of negotiations, WTO members agreed on curbing the estimated US \$22 billion in annual public support that contributes to the depletion of marine resources. The Agreement bans subsidies that contribute to illegal, unreported, and unregulated fishing ('IUU Fishing'), as well as fishing in the unregulated high seas and in overfished stocks.

Reducing such subsidies and trade barriers is an important tool to protect the oceans, marine life, the environment and ultimately help member countries make progress to the concept of a circular economy. A circular economy aims at tackling global pressing issues in a recyclable, sustainable manner, and is crucial as we move towards to the future. Thus, by reducing subsidies and public support to harmful fishing practices, immense global progress can be achieved. However, the WTO also takes note of the needs of developing and least developed countries ('LDC') in this regard. The economies of certain countries run on the development of "blue" industries that utilize ocean life. A blanket restriction by the WTO on such oceanic practices would be catastrophic to the economies of such countries.

India for instance has objected to the proposed two-year transitional period for exempting developing countries and LDCs from subsidy cuts and has been lobbying for a 25-year period to protect the fishing industry and the interests of the fishermen.

Thus, this area of international trade law is at the forefront of several intersectional issues, and we thus propose to explore this interesting area extensively at our conference and increase awareness amongst students, research scholars, policy wonks and trade professionals on such topical matters.

## STRUCTURE OF THE CONFERENCE

Apart from the inaugural and valedictory session, the International Conference will be organized in the following two parts:

**Part A:** Theme based Panel Discussions

**Part B:** Paper Presentations in Technical Sessions

## PARTICIPANTS

Through this international conference we aim to raise awareness and interest in international trade law, marine life, fisheries, blue economy, climate change and such seminal happenings. The conference will feature panel discussions, expert talks, and paper presentations. We intend on inviting environmental lawyers, academicians, economic and industry experts, law/oceanology/business etc. students and research scholars to participate and present papers in the international conference.
