on

Use of Artificial Intelligence in Legal Teaching and Research

Jointly organized by

Indian Law Institute, New Delhi and Kamkus College of Law, Ghaziabad

Artificial intelligence (AI) is a remarkable technology that enables digital computers and robots to perform tasks usually associated with intelligent beings. These tasks include reasoning, learning, uncovering meaning, and drawing inferences. With its wide-ranging applications in fields like medicine, engineering, entertainment, education, and law, AI has become an influential and ever-present force. In the realm of legal academia, AI can revolutionize teaching, research, and analysis by offering tools and methods for data analysis, information retrieval, argumentation, decision-making, and fostering creativity. By embracing AI tools and technologies, legal professionals, educators, and researchers can unlock a world of new possibilities, such as enhancing student engagement, creating personalized learning experiences, and conducting efficient legal research.

The **Indian Law Institute (ILI), New Delhi** and **Kamkus College of Law (KCL), Ghaziabad** are jointly organizing a one-day workshop on “Use of Artificial Intelligence in Legal Teaching and Research” on **July 18, 2023** at the **Indian Law Institute (ILI), New Delhi**.

The workshop seeks to acquaint law teachers and researchers from diverse institutions with the concept of AI and its application in legal academia. The primary objective is to explore and deliberate on the potential utilization of AI tools in legal teaching and research.

Objectives of the Workshop

- Introduce participants to the fundamentals of AI and its application in academia;
- Showcase how AI can be utilized for legal research, including tasks like data collection, analysis, visualization, and interpretation;
- Demonstrate how AI can enhance legal teaching, covering aspects such as curriculum

design, content delivery, assessment, and feedback;

- Offer hands-on experience with AI tools and techniques applicable to legal teaching and research; and
- Encourage participants to engage in a discussion about the opportunities and challenges associated with incorporating AI in legal academia.

Structure

The workshop will be divided into three sessions, each lasting 1.5 hours. In each session, an expert will deliver a presentation, which will be followed by a hands-on experience for the participants.

The sessions are:

Session 1: Introduction to Artificial Intelligence and its Use in Academia

This session will focus on the nuances of AI, its development, application, and challenges. It will also discuss how AI can enhance general teaching and research experience in academia in various disciplines.

Session 2: Use of Artificial Intelligence in Legal Research

This session will focus on how AI can be used for legal research. It will cover topics such as data sources, methods, tools, and platforms for legal data analysis; information retrieval systems for legal documents; argumentation and reasoning systems for legal problems; decision support systems for legal outcomes; and generative systems for legal content.

Session 3: Use of Artificial Intelligence in Legal Teaching

This session will focus on how AI can be used for legal teaching. It will cover topics such as curriculum design and alignment with learning outcomes; content delivery methods like adaptive learning; assessment methods such as automated grading, feedback, and plagiarism detection; and learning analytics and personalization.

Why Should You Attend the Workshop?

- The participants will gain a basic understanding of AI and its use in academia generally;
- The participants will learn how AI can be used for legal research and teaching;

- The participants will acquire practical skills on some of the AI tools and techniques that can be used for legal teaching and research;
- The participants will develop a network with other law teachers and researchers who are interested in using AI in legal academia; and
- The participants will identify potential areas for collaboration and further exploration on using AI in legal academia.

Who Should Attend the Workshop?

The workshop is open to participants from various backgrounds, including Law students, Researchers, Academicians, Faculty Members, and Advocates.

No prior knowledge of AI is required, as the workshop will provide both introductory and advanced sessions to cater to different levels of expertise. Participants with a keen interest in exploring the transformative potential of AI in legal teaching and research are encouraged to attend.

Venue: Indian Law Institute, Bhagwan Dass Road, New Delhi

Date: 18th July, 2023 [Tuesday]

Registration details:

Participation fee: INR 250

Last date to register: July 12, 2023

Payment note: Please make the payment using the above QR-code/UPI-address and upload the transaction/reference ID and screenshot of the UPI payment on the given Registration Form immediately after making payment.

Form: Please fill the Google form: <https://shorturl.at/luvK3>
